SUMMARY

Results-oriented software developer with 4+ years of experience in Django, React, and REST APIs. Proven ability to deliver high-performance applications in academic, financial, and business sectors. Skilled in team collaboration and process improvements.

EXPERIENCE

Tata Institute of Social Sciences, Mumbai.

Software Developer

Sep 2023 - PRESENT

- Designed and implemented core backend modules using Django for fee mapping, grade calculation, grade card generation, and room scheduling within the Student Management System (SMS).
- Developed scalable REST APIs using Django REST Framework to enable seamless integration between portals and frontend clients, significantly enhancing performance and maintainability.
- Integrated SBIEpay payment gateway into both the student fee portal and donation system, ensuring secure and reliable transaction processing.
- Optimized backend logic and database queries, contributing to a 35% improvement in page load times and enhanced user experience by 25%.
- Led full-stack architecture and deployment for internal applications such as CEMS, CESC, and the Transcendence website, ensuring high traffic capacity and robust backend logic.

SKILLS

- Backend:** Python, Django, Django REST Framework
- Frontend:** React, JavaScript, HTML5, CSS3, Bootstrap, Tailwind, FIGMA.
- Databases:** PostgreSQL.
- DevOps:** Docker, Nginx, AWS (EC2), Gunicorn
- Tools:** Git, Linux

CORE Competencies

- Full-Stack Web Development.
- Cross-Functional Team Collaboration.
- Performance Optimization.
- Code Quality Assurance.
- Problem Solving.
- Process Improvement.

Key Projects :

- **Student Management System (SMS):**
Engineered backend features for fee structure automation, result processing, grade card PDF generation, and dynamic academic scheduling using Django ORM and PostgreSQL.
- **Donation & Invoice Portal:**
Built a secure backend system for public donations with **auto-generated invoices**, audit logging, and staff management dashboard — reducing manual effort and errors by 40%.
- **Admission Portal:**
Developed the backend for a full-cycle student admission process, using **Django REST APIs** to sync real-time applicant data with the central SMS database.

Tata Institute of Social Sciences, Mumbai.

Jr. Software Developer

Aug 2022 - Sep 2023

- Contributed to backend development and maintenance of Django-based web applications by implementing new features, optimizing existing modules, and resolving performance bottlenecks.
- Debugged and fixed critical backend issues in production environments, improving application reliability and load performance.
- Integrated **SBIepay payment gateway** into the donation system, ensuring secure and seamless transactions for donors and real-time invoice generation for staff.

Key Projects :

- **Invoice & Donation Portal:**
Developed and maintained the backend for TISS's donation system using Django. Key contributions included **SBIepay payment integration**, auto-invoice logic, and **critical bug resolution**, reducing manual work and boosting financial tracking accuracy.
- **Website Management System:**
Supported development and deployment of high-traffic institutional sites including **tiss.edu** and **admission.tiss.edu**. Implemented modular backend components and contributed to content management workflows, leading to a **25% increase in user engagement**.

EDUCATION

DR. D.Y. PATIL, VIDYAPEETH PUNE.

Pune (Distance Learning) **MBA(IT Management)**

July 2020 - Aug 2022

Certified Project: Created banking solutions web applications hosted on Heroku.

ST. WILFRED EDUCATION SOCIETY, Shedung, Panvel.

Bachelor in Computer Science

April 2017 - May 2020

Nettech Solutions Pvt. LTD. Rabale, Navi Mumbai.

Software Engineer

Jun 2021 - Aug 2022

Developed, tested, and deployed **Django-based web applications** for banking clients, focusing on data integrity, user verification workflows, and secure integration with third-party services.

Built responsive, user-friendly interfaces using **HTML, CSS, and JavaScript**, while ensuring backend performance with optimized Django views and models.

Managed deployment of new application releases to client servers, ensuring **smooth go-lives with minimal downtime** and full compliance with banking protocols.

Provided CMS training and backend support to client-side teams, aiding in adoption and reducing support ticket volume.

Key Projects:

- **UMAC & CKYC Verification Portals:**
Integrated multi-step dynamic forms for customer verification and automated data sync to the **CERSAI Portal**, enhancing compliance processes and reducing manual workload.
- **Banking Deployments:**
Delivered custom Django modules and updates for multiple cooperative banks including **Sindhudurg Bank, Model Bank, and Hanumanta Bank**, ensuring application stability in production.
